

# Simple Soil Science

## **Step 1:**

Take a detailed **Cation Displacement Test** for A&L Labs across your growing area to find out your true TCEC. This will determine whether you use the **SLAN method** or the **BCSR method**.

## **Step 2:**

Request **Basic Test** from Perry Labs plus check for Boron, Iron, Manganese, Copper, and Zinc. Under **Other Test** specify Sodium, Bray P2 and Water pH.

## **Soil Lab Contact Information:**

A&L Labs  
1331 Woodland Ave. Suite #1  
Modesto, CA 95351  
(209)-529-4080  
al-labs-west.com

Perry Agricultural Laboratory  
15241 Pike 138  
Bowling Green, MO 63334  
(573) 324-2931  
perryaglab.com

## **Soil Consultant**
